Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

TABLE OF CONTENTS

VOLUME 19 1918

PAGES

BLISS, G. A., of Chicago, Ill. The problem of Mayer with variable end points 305

BRINK, R. W., of Cambridge, Mass. A new integral test for the convergence and divergence of infinite series 186

CHITTENDEN, E. W., of Champaign, Ill. (with A. D. Pitcher). On the foundations of the *Calcul fonctionnel* of Fréchet 66

DANIELL, P. J., of Houston, Tex. Differentiation with respect to a function of limited variation 353

EISENHART, L. P., of Princeton, N. J. Transformations of applicable conjugate nets of curves on surfaces 167

ETTLINGER, H. J., of Austin, Tex. Existence theorems for the general real self-adjoint linear system of the second order 79

FITE, W. B., of New York, N. Y. Concerning the zeros of the solutions of certain differential equations 341

FORD, L. R., of Cambridge, Mass. Rational approximations to irrational complex numbers 1

FRÉCHET, M., of Poitiers, France. Relations entre les notions de limite et de distance 53

GLENN, O. E., of Philadelphia, Pa. A fundamental system of formal covariants modulo 2 of the binary cubic 109

HAZLETT, OLIVE C., of South Hadley, Mass. On scalar and vector covariants of linear algebras 408

HILDEBRANDT, T. H., of Ann Arbor, Mich. On boundary value problems in linear differential equations in general analysis 97

HU, M. F., of Shanghai, China. Linear integro-differential equations with a boundary condition 363

MANNING, W. A., of Palo Alto, Cal. The order of primitive groups (III). 127

MACMILLAN, W. D., of Chicago, Ill. On the reduction of certain differential equations of the second order 205

MATHEWSON, L. C., of Hanover, N. H. On the group of isomorphisms of a certain extension of an abelian group 331

MILLER, G. A., of Urbana, Ill. Sets of independent generators of a substitution group 299

MILNE, W. E., of Brunswick, Me. On the degree of convergence of Birkhoff's series 143

MITCHELL, H. B., of New York, N. Y. On the imaginary roots of a polynomial and the real roots of its derivative 43
MITCHELL, H. H., of Philadelphia, Pa. Proof that certain ideals in a cyclotomic realm are principal ideals 119
OSGOOD, W. F., of Cambridge, Mass. Singular points of analytic transformations 251
PITCHER, A. D., of Cleveland, O. (with E. W. Chittenden). On the foundations of the *Calcul fonctionnel* de Fréchet 66
SHARPE, F. R., of Ithaca, N. Y. (with V. Snyder). Space involutions defined by a web of quadrics 275
SIMONDS, E. F., of Urbana, Ill. Invariants of differential configurations in the plane 223
SNYDER, V., of Ithaca, N. Y. (with F. R. Sharpe). Space involutions defined by a web of quadrics 275
WALSH, J. L., of Cambridge, Mass. On the location of the roots of the jacobian of two binary forms, and of the derivative of a rational function 291
WHITTEMORE, J. K., of New Haven, Conn. Spiral minimal surfaces 315
WILDER, C. E., of Evanston, Ill. Problems in the theory of ordinary linear differential equations with auxiliary conditions at more than two points 157
